How To Take Your Face + Body Photos

To see all of you, please submit eight (8) clear photos of your face, hands, feet and body (see sample photos below):

1. Face – Front (mouth closed)
2. Face – Front (smiling with teeth showing)
3. Face – Side Profile
4. Full Body – Front
5. Full Body – Back
6. Full Body – Side Profile
7. Both feet
8. One or both hands (both if there are distinct differences between right and left)

Important: Ask someone to take these photos for you, rather than taking them yourself in the mirror. This will allow your natural posture to be seen clearly without holding a camera.

Your full body photos must show the contours of your whole body with as much skin shown as possible. The more visible your body, the more insight I can share about your unique form

What To Wear

- Tight-fitting clothing, ideally a bathing suit, yoga wear or similar (make sure most of your spine is visible – no shirt or swim suit that covers the upper or lower back too much)
- No glasses on your face
- No shoes or socks
- Hair tied back and fringe clipped back so we can see your whole forehead and ears
- No makeup, especially eyebrow pencil (we want your natural brows baby!)
